

January 2010

Welcome to "What's (not) Shaking" from Vistek Inc.

Greetings!

In this issue we will spotlight some items you may or may not know about Vistek Incorporated and our Vibration Isolation Solutions. We will also show you some Simple Solutions that we have designed for new and different instruments, tools and other

WHAT'S ^{NOT} SHAKING

Custom Solutions

Every day we are creating new and unique solutions to vibration problems. Here you see a photo of a custom solution we designed to isolate vibrations in a double stack of water jacketed incubators. The customer was having problems with standing waves in culture dishes, resulting in uneven attachment of cells to tissue culture dishes. We created a platform 26" square out of ½" steel with black powder coating and added 6 of our bearings and now it is isolating a load of over 600 pounds from errant vibrations. Now according to the customer "The problem is solved".

What could we design for you?

About our products

All Vistek products use our Vibration Isolation Bearings (VIB's) which are passive, mechanical and maintenance free. This means you do not need any electrical to power them or to power any air compressors which means, no air hoses, no additional equipment, no constantly running engines to distract or annoy. Simple Solutions.

Webinar

Would you like to know more about our products and how they work? Contact Scott Bailey and he will happily present a live webinar where you can see the Vistek products via webcam and ask any questions that you like. This free WebEx webinar is a great way to learn about Simple Solutions to your vibration dilemmas in 15 minutes or less.
